

KNIGHTON HEATH GOLF CLUB

5 YEAR

IMPROVEMENT PLAN

INTRODUCTION

This document has been produced by the greens committee, to prioritise the main projects identified to improve our course over the next five year period (2013 – 2018).

The proposals cover all aspects of the course but should also be read in conjunction with the '5 year Forestry Plan' for completeness.

Note: In some cases the projects have been identified to counter a recurrence of the damage caused by the adverse weather conditions seen over the past year.

Each year we will further select the main priorities from this document and submit them to the management committee for approval as part of the annual course budget. It may be that due to financial constraints encountered in any given year, part or all of the budget could be withdrawn. In that case the projects not completed will be carried forward to the next budget review.

The intention of this document is to give the members full visibility of the course improvements proposed and have them approved by the management committee.

GREENS

- 5th Green, to build a new green and reshape the surrounding area.
- 13th Green, to build a new green and reshape the surrounding area.

TEES

- 3rd Tee, to level and re-orientate.
