### NEWS FLASHES

#### Course Update

The green keepers have been kept busy clearing up after the high winds that hit the course on Monday and Tuesday.

On Tuesday morning it took 4 green staff 4 hours to clear the greens and approaches for play.

Following this we started cleaning the tees.

Wednesday morning we had to start again cleaning the greens for play and finishing off clearing the tees

As you can see from the picture the sweeper has been out on the fairways and semi rough working in conjunction with the tractor mounted blower to clean the fairways and semi rough.

Next week if the temperature starts to stabilize overnight we will get more constant growth which will provide a better playing surface.
