	There being no further business the meeting closed at 20:45.	
	CHAIRMAN	DATED

COMMITTEE REPORT

August 2012

7 (a) COURSE WORK

Greens

They have been verti drained to cope with the continuing rain. We are topdressing when we can.

The last lot of topdressing we had was contaminated so we rejected this and have been resupplied for free.

Tees

The tees have been treated with a selective weed killer and are being divoted as needed.

Fairways

These are growing like mad, we are cutting 3 times a week and this is still not enough to stop grass clippings being left on the surface.

Holes 13, 15 and 16 have been treated with a selective weed killer.

Approaches

These have been treated with a selective weed killer.

Bunkers

Raked as required.

Rough

The rough is slowing down so less cutting required.

Long rough

Because for the wet summer we have had so far this area has grown more than ever.

Due to this I have found out how much a flail/collector would cost so that these areas can be managed better.

If we just cut these areas and not collect the clippings then next year they would get thicker still and we do not want this.

Please see below for cost

Pathways and Mats

The paths will be edged and weeds removed on a more regular basis.

Irrigation

We are replacing sprinklers as needed.

STAFF

Andy is being enrolled into the college at this time.

Bernie, Mark and John are all pulling in the same direction, which will produce a good golf course.

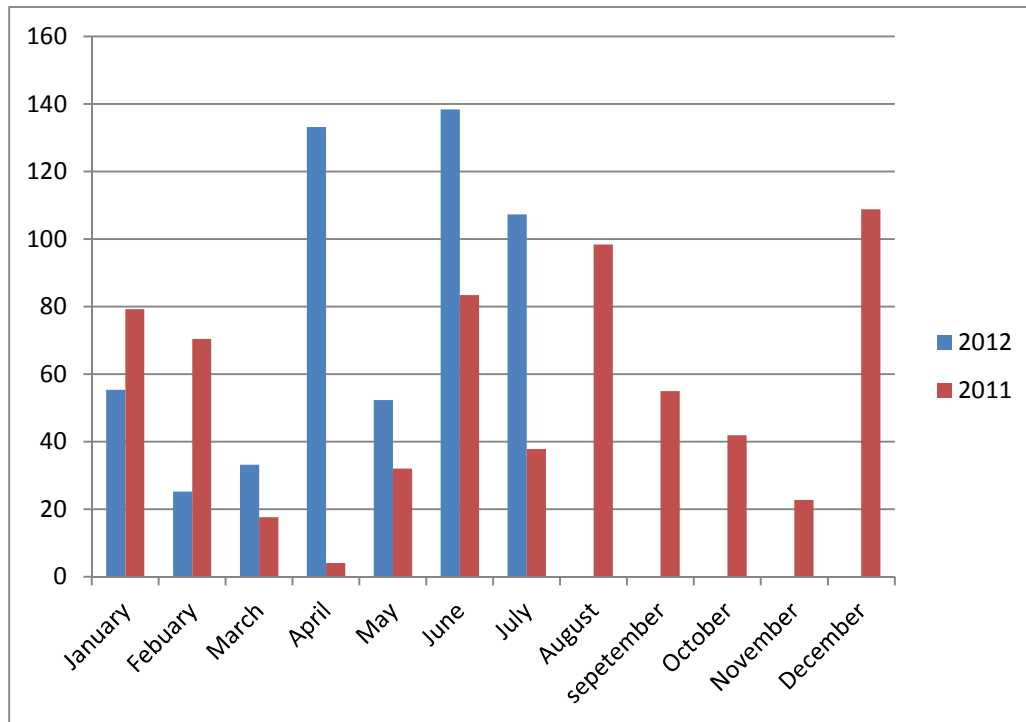

GENERAL

We have had some damage to the course over the last few weeks and I have contacted the police and they will step up their patrols on and around the course at dusk when the damage is happening.

I have also told the police that the can exercise their dogs on the course at night if they need to. This will stop people coming onto the course because word will get around about the police presence.

RAIN

See table below for how much rain we have had so far.

As you can see we have had our share of the rain.
