

RAIN, RAIN AND YET MORE RAIN

Last winter from September to February we had

435.3mm or 17.4 inches of rain

This winter from September to February we have had

859mm or 34.3 inches of rain

We have nearly had twice the amount of rain this winter to what we had last winter and we are still due more rain.

We appreciate your patience at this difficult time with the closures and restrictions that have been necessary.
